# Edukalibre project

*Jesús M. González Barahona  
GSyC, URJC*

*Madrid meeting, 2005.12.01*

---

*Main activities at URJC (since July)*

**1**

## **Main activities at URJC (since July)**

- Supporting the Edukalibre repository
- Developing and testing the final version of the Edukalibre repository
- Developing and testing the final version of the COLLAB tool
- Maintaining website and other facilities
- Some dissemination activities and links to other groups
- Teo visting in Leeds
- Starting with the final report

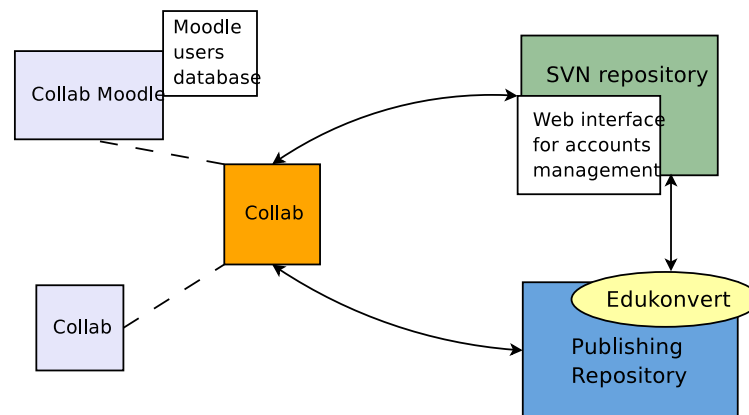

## Edukalibre/Collab: new features (1)

- More clear modules:
  - Subversion server
  - Publishing Repository
  - Interfaces (COLLAB and COLLAB/Moodle)
  - Edukonvert

## Edukalibre/Collab: new features (2)

- Improved composition of modules (1 COLLAB or 1 PR with n SVN servers)
- Edukonvert works also standalone
- Edukonvert supports plugins
- COLLAB supports skins
- COLLAB supports CSS and customizable design
- COLLAB and COLLAB/Moodle support localization
- Support for document branches
- Support libraries completely redesigned (now clean split with applications)

## Edukalibre/Collab Architecture

## Final report: some issues

- Detailed report about expenses (pp. 7-12), per partner: details for each item
- Detailed report about results, (pp. 15) per partner: publications, software, courses, materials, etc.
- Comments and contributions to the general parts
