
Edukalibre project: the team at URJC

*Jesús M. González Barahona
GSyC, URJC*

Kick-off meeting, 2003.10.30

URJC: Universidad Rey Juan Carlos

1

URJC: Universidad Rey Juan Carlos

- Young University in the South of Madrid
- Four campuses
- About 15,000 students
- In Móstoles (ESCET): computer science studies
- Institutional support for this project

Personnel participating

Professors and assistants:

- Jesus M. González-Barahona
- David Ríos Insúa
- Gregorio Robles Martínez
- others have shown interest

Research assistants:

- Diego Chaparro
- Luis Cañas Díaz
- probably others

Background

- Experience and recognition in the libre software world
- Research in data communications and distributed systems
- Use of electronic tools for support to teaching
- Management of programs for the introduction of electronic tools for support to teaching
- Institutional support

Main roles

- Coordination and relations with the Commission
- Software development
- Basic infrastructure (e.g., web site)
- Large responsibilities in the final testbed
- Interest in pedagogical aspects

Main interests

- Research: exploring how libre software models can be translated to teaching experiences
- Institutional: providing teachers and students with next-generation educational tools
- Long-term: building high-quality libre software tools for electronic support to teaching
