## Site news

**New version of Moodle**  
by [Evgenia Suzdaleva](#) - Monday, 7 June 2004, 12:48 PM

We have upgraded our version of [Moodle](#), now we have Moodle 1.3.

There are many improvements in different areas, especially in controlling courses. These new capabilities will be investigated in terms of collaboration and utility for us.

Everything useful for us will be surely ascertained 😊

**A bit of history**  
by [Evgenia Suzdaleva](#) - Tuesday, 25 May 2004, 07:08 PM

First of all, I would like to tell a couple of words about our task in working in the [Edukalibre](#) project. Briefly, this project has been only begun and is directed at shared development and exploitation of web-based information systems applied to education. Only *libre* (free, open source) software can be used.

**Welcome to EdukaLibre page in UTIA AS!**

This site has been created with the help of [Moodle](#).

What is Moodle? It is a software package designed to help educators create quality online courses.

Moodle is [Open Source](#) software, which runs without modification on Unix, Linux, Windows, Mac OS X, Netware and any other system that supports [PHP](#), including most webhost providers. Data is stored in a single database: [MySQL](#) and [PostgreSQL](#) are best supported, but it can also be used with Oracle, Access, Interbase, ODBC and
